

Managing Product Data

This is a high level overview on how product data is entered and maintained into your website. If you are not familiar with database driven websites make sure to watch the video on “How Database Driven Websites Work” before continuing with this video.

There are 3 basic ways are:

1. Imported from your ERP system (MAS, Accpac, Great Plains, etc).
2. CSV File Uploads.
3. Web Driver Add/Edit Form.

So which methods will be used on your site?
